Custom Sheet Metal Fabrication Services

Panels and Pipes sheet metal fabrication services offer custom and specialty metal fabrication, and a full range of metal fabrication services to meet customer specifications and project specific designs for commercial, industrial and specialty needs.

Fabrication Shop
St. George, Ontario

Our 7,400 sq. foot facility in Timmins, Ontario and our 13,000 sq. foot facility in St. George, Ontario allows us to fabricate all your HVAC sheet metal needs using

a range of metals including copper, stainless steel, aluminum, galvanized steel, and more. We are able to fabricate from customer prints or drawings, aid in design, or build projects to specification with the latest techniques and computerized equipment to create top quality products for field installation.

Timmins Shop
Timmins, Ontario

Our in-house fabrication services mean you will have the right material on the job at the right time, created as cost-effectively as possible with the latest techniques and computerized equipment to create top quality products for field installation. Using state-of-the-art equipment in our fabrication shop allows us to complete your project's needs accurately and on time.
